

# IRCTC Website

## Release Notes

### Version

- Version: X.X.X

### Release Date

- Date: 2025-06-14

### Overview

This update improves the IRCTC website by optimizing booking performance, refining the interface, and resolving key bugs to ensure seamless navigation and transaction processing.

### New Features

- **Faster Ticket Booking:** Optimized backend processes to reduce booking time and enhance the transaction speed.
- **Enhanced UI/UX:** Improved website design with better accessibility and mobile responsiveness.
- **PNR Status Alerts:** Users can now receive real-time PNR status updates via SMS and email.

### Improvements

- Enhanced search functionality with better filtering options for trains, quotas, and seat availability.
- Improved security features to ensure safe transactions and data privacy.
- Optimized loading speed for key pages, reducing wait times during peak hours.

### Bug Fixes

- Resolved an issue where users faced session timeouts during the payment process.
- Fixed incorrect train schedule displays for certain routes.
- Addressed login-related issues affecting certain user accounts.

### Known Issues

- Some users may experience minor delays in ticket confirmation status; a fix is in progress.

## How to Access the Update

Users can experience the updated IRCTC website by visiting [www.irctc.co.in](http://www.irctc.co.in) and clearing their browser cache for the best performance.
